

Game Dev

Week 2 - Introduction to Module

lecturer: Matt Smith

- Email: matt.smith@tudublin.ie
- Github: dr-matt-smith <https://github.com/dr-matt-smith>
- Campus Office: E 042

email is best way to contact me outside of lecture/labs

NOTE: please do NOT direct message me via Teams or Moodle/Brightspace - use email ...

**dr-matt-smith**

 **Overview**  **Repositories** **1.2k**  **Projects**  **Packages**  **Stars** **3**

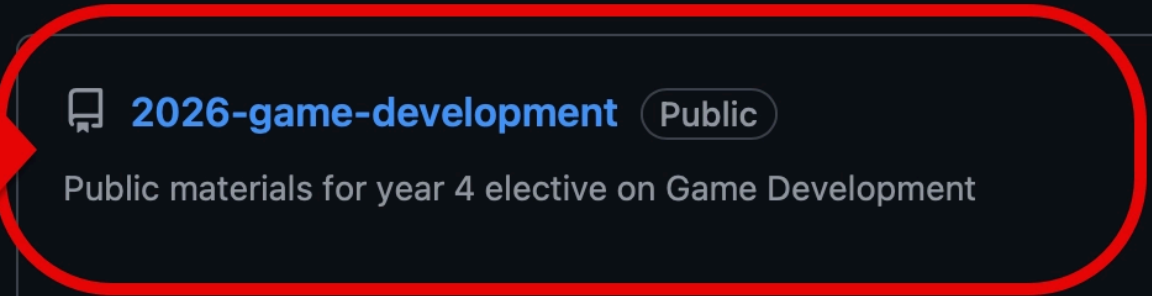

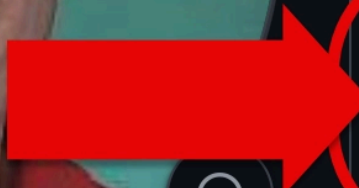

Pinned

 **2026-Design-Patterns** **Public** 

Public materials from my university module about OO Design Patterns and software quality

 **2026-game-development** **Public** 

Public materials for year 4 elective on Game Development

Learning outcomes

- LO1:
 - Critically describe, and apply, typical features of the Software Development Life Cycle tailored to **team-based game development projects**
- LO2:
 - Critically evaluate the costs/benefits of **Distributed Version Control** (i.e. `git`), and argue its appropriateness for team-based game development projects

The goal is not the game you develop, it's what you learn about:

- **team-based game development ...**

Game Dev module: semester plan (indicative = may change)

Monday	wk	wk	Topic	Assessment Component		100%
14-Sep	1	module	-- elective choice week --			
21-Sep	2	1	Sprint 1 - week 1	s1		
28-Sep	3	2	Sprint 1 - week 2		Indivdual 5% & Team 5%	10%
05-Oct	4	3	Sprint 1 - week 3		Indivdual 5% & Team 5%	10%
12-Oct	5	4	Sprint 2 - week 1	s2	Indivdual 5% & Team 5%	10%
19-Oct	6	5	Sprint 2 - week 2		Indivdual 5% & Team 5%	10%
26-Oct	7		-- Review week --			
02-Nov	8	6	Sprint 2 - week 3	s2	Indivdual 5% & Team 5%	10%
09-Nov	9	7	Sprint 3 - week 1	s3	Indivdual 5% & Team 5%	10%
16-Nov	10	8	Sprint 3 - week 2		Indivdual 5% & Team 5%	10%
23-Nov	11	9	Sprint 3 - week 3		Indivdual 5% & Team 5%	10%
30-Nov	12	10	present and defend		Mon 30 November 2026	20%
07-Dec	13	weeks	-- FYP project week --			

- we have SHORT semester - 10 weeks (including today)
- scope
 - do NOT try to create a big game
- avoid
 - networking / NPC AI /
 - creating assets / animations / models / sounds
 - 3D !!!!

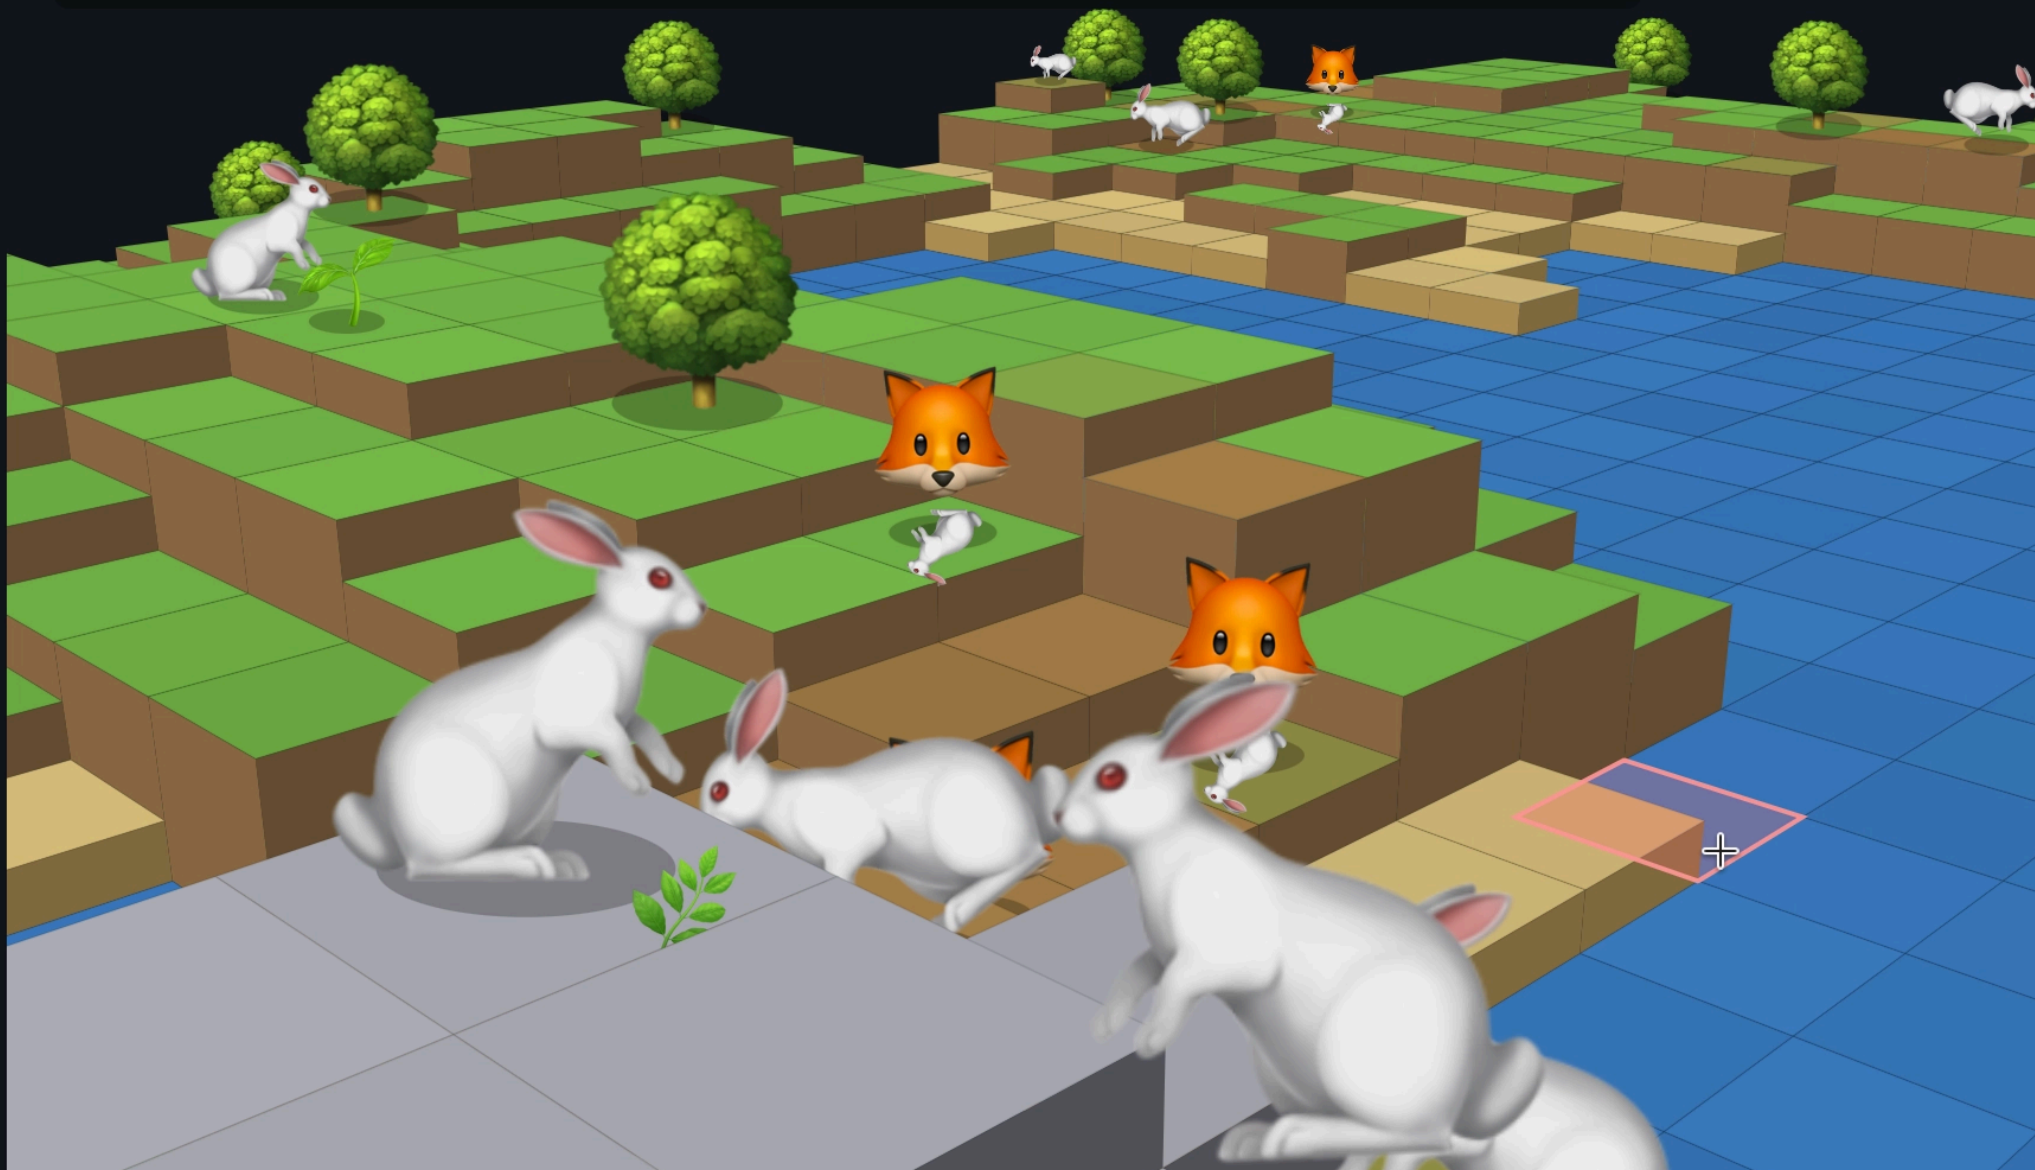

I strongly recommend TypeScript, 2D game
- classic game

<> index.html ×

celmoji terrain prototype - 32x32, seed 1337, 20 🐰 6 🦊 · font: noto
drag / WASD: pan · right-drag / Q,E: rotate · wheel: zoom · R: new seed · toolbar: edit

for those working in Celbridge

- we'll have Chris Gregan for some of our workshops
 - (professional game developer)
- we can look at custom tools
 - e.g. level designs, dialog data in CVS/Spreadsheets etc.

If we have a Unity team

- I can help with them :-)

It's surprising how a simple basic game can be enhanced to be something a bit new and a lot more fun ...

Video:

- Juice it or lose it:
- <https://www.youtube.com/watch?v=Fy0aCDmgngxg>

Team 1	Team 2
Oscar Neiland Mateusz Sewerynski Cathal Farrell	Patryk Pasik Isabella Higgins Sean Kelly

Team 3	Team 4
Ryan O Connor Mc Carthy King Kiaku Dean Smith	Brevin Monks Jack O Sullivan Paul Adelabu Laurence Quinn

1. Unity - die hard team??

- if you **MUST** do a Unity game, find 2 others and we'll make a Unity 3-person team
- ensure you've **EXPERIENCE** of creating Unity games (> just year 2 module ...)

1. **sprint 1** = re-implement a version of the class game in TypeScript
2. **sprint 2** = add novel features - morph it into a *your* game
3. **sprint 3** = juice it / make it fun / add levels, screens etc.

Tasks today - in your teams:

1. choose your genre
2. choose your classic game (not breakout!)
3. create team Github repo
 - add/invite team and Matt !
4. agree tasks to complete before 12:00 next Monday
5. HOW -
 - branches / pull requests / CI - testing
 - who/how PR's merged into main? ...
